Mathematics

43601H

Unit 1

Monday 7 March 2011 9.00 am to 10.00 am

H

For this paper you must have:

- a calculator
- mathematical instruments.

Time allowed

- 1 hour

Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 54.
- The quality of your written communication is specifically assessed in Questions 2, 3 and 8. These questions are indicated with an asterisk (*)
- You may ask for more answer paper and graph paper. These must be tagged securely to this answer booklet.

Advice

- In all calculations, show clearly how you work out your answer.

M A R 1 1 4 3 6 0 1 H 0 1

Answer **all** questions in the spaces provided.

1 Is money discrete or continuous?
Tick a box.

Discrete

Continuous

Give a reason for your answer.

.....
.....

(1 mark)

***2** A company pays people to visit shops and test customer service.
Paul works for this company.
His fees in October are shown.

Fee (£)	Frequency
8	10
10	18
12	7
15	4
20	1

2 (a) Calculate his mean fee.

.....
.....
.....

Answer £ (3 marks)

2 (b) Paul says that his modal fee and his median fee are both £10.
Is he correct?
Give reasons and working to show how you decide.

.....
.....
.....
.....

(2 marks)

2 (c) Shelley also works for this company.
Her fees in the same month are shown.

Shelley's fees

Give **one** similarity and **one** difference in the fees of Paul and Shelley.

Similarity

.....

Difference

.....

***3** Each day 147 trains leave Lea Road station.
One day, most trains are on time (0 minutes late).
19 trains are late.

3 (a) What percentage of trains are late?
Give your answer to 1 decimal place.

.....
.....
.....

Answer % (3 marks)

3 (b) The station manager records the number of minutes late for each of the 19 trains.

6 11 1 21 8 10 17 4 35 22
2 3 41 8 23 7 16 28 19

3 (b) (i) Draw an ordered stem-and-leaf diagram to show the data for the late trains.
Complete the key.

Key: | represents minutes late

.....
.....
.....
.....
.....

(4 marks)

3 (b) (ii) For the 19 late trains, write down the modal number of minutes late.

Answer minutes (1 mark)

3 (b) (iii) Write down the modal number of minutes late for all 147 trains.

Answer minutes (1 mark)

3 (c) The station manager says,
“The late times are all one minute less than I recorded.
For example, the train I recorded as 6 minutes late was actually only 5 minutes late.”

Which modal number of minutes late changes?
Tick a box.

The 19 late trains

All 147 trains

Both

Neither

Give a reason for your answer.

4 (a) A shop sells red roses and white roses in the ratio 7 : 2
One day 392 red roses are sold.

How many white roses are sold?

.....
.....

Answer (2 marks)

4 (b) A different shop sells red roses and white roses in the ratio 8 : 3

What is the probability that a rose, sold at random, is red?

.....

Answer (1 mark)

5 A company makes 200 Easter bunnies.
It costs £2.46 to make each bunny.

28% of the bunnies are given to a charity.
Three-quarters of the rest are sold for the full price of £4.
Any left over are then sold at half price.

How much profit does the company make?

.....
.....
.....
.....
.....
.....

Answer £ (4 marks)

6 Matt and Ruba each have one coin.
The total amount of money is less than 50p.

Work out the probability that exactly one of the coins is a 10p piece.
Assume that all possible coins are equally likely.

.....

.....

.....

.....

Answer (4 marks)

Turn over for the next question

7 (a) Maggie interviews a random sample of local people.
She asks,

“What percentage of Members of Parliament (MPs) do you think are female?”

Write a suitable response section for this question.

(2 marks)

7 (b) Give an advantage of interviewing people instead of using a postal questionnaire.

.....
.....

(1 mark)

7 (c) At the beginning of 2010 there were 126 female MPs.
This was 19.5% of the total number of MPs.

7 (c) (i) Calculate the number of male MPs.

.....
.....
.....
.....

Answer (3 marks)

7 (c) (ii) Maggie questions a sample of MPs stratified by gender.

Complete the table to show the number of MPs in a sample of 50.

*8 Two groups of people are trying to lose weight.

8 (a) Group A join a gym.
The graph shows information about their weight loss after one month.

8 (a) (i) How many people are in group A?

Answer (1 mark)

8 (a) (ii) Does everyone in group A lose weight?
Write down how you decide.

.....
.....

(1 mark)

8 (b) Group B follow a diet.
The box plot shows information about their weight loss after one month.

Does everyone in group B lose weight?
Write down how you decide.

.....

.....

(1 mark)

8 (c) Compare the weight loss of group A with group B.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(5 marks)

- 9 The table shows information about the length of time that 180 people are shopping.

Time, t (minutes)	Frequency
$60 < t \leq 150$	18
$150 < t \leq 180$	66
$180 < t \leq 240$	60
$240 < t \leq 360$	36

- 9 (a) Draw a suitable frequency diagram for the data.

(3 marks)

9 (b) Calculate an estimate of the average length of time for those people who are shopping for over three hours.

.....
.....
.....
.....

Answer minutes (2 marks)

9 (c) Two people are chosen at random from the 180 people.
Estimate the probability that both are shopping for less than two hours.

.....
.....
.....
.....
.....

Answer (3 marks)
